RELIABLE PROTECTION

PACCAR Engines are designed with your business in mind. Your truck is powered by a reliable PACCAR Engine and having a PACCAR Protection Plan on your engine is a smart business decision that ensures you have protection you can rely on.

There are various extended protection plan options available for the PACCAR MX Engine, so you can select a plan that meets your business and application. A PACCAR Protection Plan provides a sense of security and peace of mind for the unexpected engine repair expense if something occurs after the base engine warranty expires.

Best of all, your authorized PACCAR Engine service location handles all of the paperwork for you.

PACCAR MX BASE WARRANTY

The base warranty for the MX Engine is comprehensive in its coverage. The warranty period is 2 years or 250,000 miles (400,000 km), whichever occurs first and includes virtually everything at no additional cost:

**2 YEARS/250,000 MILES (400,000 KM)
TOTAL COVERAGE***

- Full parts and labor on warrantable failures†
- Travel or towing when an engine is disabled by a warrantable failure or further operation would cause damage (from date of delivery through second year)
- Consumables not reusable due to covered failure
- No deductible

†Warrantable failures are those due to defects in material or factory workmanship.

EXTENDED COVERAGE TAILORED TO YOUR BUSINESS

When purchasing your new truck consider a PACCAR Protection Plan as customizing protection for your business. Extended coverage allows you to select the years of protection that will match the length of time that you plan to use your truck.

Extended coverage protects your business from unexpected expenses and ensures that your engine receives quality parts and professional service. There are four different options to choose from for the PACCAR Engine and one for the Aftertreatment System, ranging from three to seven years in length.
